CAREER OBJECTIVE

B.Tech student with a strong foundation in Artificial Intelligence and Machine Learning, seeking an opportunity to apply technical knowledge to real-world problems. Experienced in developing an AI-based Hospitality Personalization System to enhance user experience through data-driven solutions. Aiming to contribute to innovative projects while continuously improving skills in machine learning, data analysis, and software development.

EDUCATION

Bachelor of Technology - Computer Science and Engineering

Dr. A.P.J. Abdul Kalam Technical University, Uttar Pradesh

Oct 2023 – Jul 2027
(till 5th sem): 75.74%

Intermediate(XII), PCM

Kendriya Vidyalaya Mati

Apr 2021 – Mar 2022
Percentage: 88.6%

High School(X)

Kendriya Vidyalaya Mati

Apr 2019 – Mar 2020
Percentage: 83.6%

SKILLS

Core CS Skills: Data Structures & Algorithms, Database Management Systems, Web Development, Operating Systems, Object-Oriented Programming (OOP), Computer Networks, Machine Learning, Generative AI.

Languages: C, C++, Python, JavaScript, SQL

Frameworks: React.js, Node.js, RESTful APLs

Libraries: NumPy, Pandas, TensorFlow, Matplotlib, Scikit-learn, NLTK.

SoftSkills: Collaboration & Teamwork, Effective Communication, Adaptability, Quick-Learner.

PROJECTS

AI-Powered Answer Sheet Evaluation(Ongoing) | React.js, Node.js, OCR, NLP APIs.

Ongoing

- Engineered an AI-based tool that extracts handwritten text and evaluates content using NLP, achieving **85%** accuracy in mock evaluations

Hospitality Personalization System [🔗](#) | AI-driven platform using LLMs to elevate guest experiences.

Aug 2025 - jan 2026

- Leveraged **NLP** techniques to analyze guest feedback and deliver timely **insights** for service improvement.
- Built a **recommendation** engine tailored to user **preferences**, enhancing the overall guest experience.
- Integrated **real-time alert** mechanisms for service teams to proactively **resolve issues** and boost satisfaction.

House Price Prediction System — ML Pipeline

- Built ML pipeline with preprocessing, feature engineering, and regression models (Linear Regression, Random Forest).
- Optimized using cross-validation and hyperparameter tuning; evaluated with R^2 , MAE, RMSE.
- Deployed model using Flask/Django API for real-time predictions.

CERTIFICATIONS

- Deloitte Cyber Security Virtual Internship - Forage
- Python for Data Science by Infosys Springboard.
- Google Analytics Certification.
- Prompt Engineering with GitHub Copilot Certification.

[View Certificate](#) [🔗](#)

[View Certificate](#) [🔗](#)

[View Certificate](#) [🔗](#)

ACHIEVEMENTS

- Solved **250+** problems across platforms like **LeetCode**
- Qualified the first round of the **Naukri Campus Young Turks** Program
- 5 Star **Problem-Solving** at HackerRank.

[Leetcode](#) [🔗](#)

[Naukri](#) [🔗](#)
